

Make a Unicorn Plant Pot!

You will need:

- 1 empty pop bottle
- Pens
- Scissors
- Strips of newspaper
- PVA glue
- Glitter (optional)

1. With a felt tip, draw your unicorn's horn and ears half way up the pop bottle.
2. With an adult's help cut away the top part of the bottle (you don't need it). Recycle what you can!
3. Then cover your unicorn shape in a layer of newspaper dipped in glue (Papier-mâché).
4. Allow it to fully dry then paint it. Add some facial features and decorations.
5. Fill with soil and some seeds or repot an established plant.
